Employment history

Company **Honda** - www.honda.co.uk
Position Senior Developer (July/2008 – current)

- Duties**
- Primary developer responsible for developing and maintaining fourteen out of the thirty one Java applications, running on Honda's infrastructure.
 - Represent the Java team in Honda's internal Technical Architecture Board, tasked with raising the maturity level of development within Honda.
 - Responsible for transferring the entire Honda.co.uk website onto a new active-active(DR) hybrid cloud based infrastructure hosted by ICM.
 - Personally built two out of the eight Java applications that run the Honda website usedCars and onlinePurchase - an e-commerce application integrated with Barclays (who handle our financial transactions). Also personally built the orderManagement application for the Intranet, which manages orders purchased via the onlinePurchase.
 - Primarily developer responsible for maintaining the core honda utilities.jar now used by all other website applications. This utility jar holds all common code, (transforming XML, caching, sending secured email).
 - Have participated in over ten projects including (Dealer website admin (Groovy/Grails), Motorcycle refresh, Penetration testing, LMS upgrade, ELV upgrade, Online purchase/Order management, Insight launch, initial customer website launch).

Company **Central Office of Information** - www.coi.gov.uk
Position Java Developer (09/2003 – 06/2008)
Technologies Java, Spring/Hibernate, JUnit, XML/XSLT, JSP/Servlets, Struts, Oracle 8i

Duties As the sole developer, wrote a full stack Intranet/CMS with the functionality

- Allow a user with no HTML knowledge, to seamlessly administrate content on the Intranet by creating/editing a Microsoft Word document. The Word document was transformed by XSLT into XHTML for display on the site.
- Integrated with eDirectory via LDAP providing the users the ability to administer their personal details in a friendly web interface, and allowing others to search for them on both the Intranet, and the email system.
- Integrated via XML with the Human Resources application to distribute the company policies to all members of staff.
- Integrates via an Oracle database with FJMS (a financial package)
